About Me

I work as a consultant at the Danish company Epinion. I have extensive training in, and years of professional experience with, quantitative methods, spatial data analysis, and causal inference using non-experimental data. I have a passion for programming and visualizing data in R as well as years of experience with survey data and working in private, public, and political organizations. Beyond this, I am interested in politics, sports analysis, and the intersection between sport and politics. I love playing around with data to tell interesting and/or important stories and to present these visually.

Education

University of Copenhagen, MSc in Political Science — 2021

- *GPA: 11.7/12.0*
- *Specialization in Political Behavior and Advanced Quantitative Methods*
- *Relevant coursework: Managing and Analysing Cross Sectional and Spatial Data in Social Science, Advanced Quantitative Methods in the Study of Political Behavior, Design-Based Research in Criminology, Political Behavior*

University of North Carolina at Chapel Hill, Visiting student — 2018

- *Relevant coursework: Applied Econometric Analysis*

University of Copenhagen, BSc in Political Science — 2017

- *GPA: 9.1/12.0*
- *Relevant coursework: Research Methods I, Research Methods II, Advanced Quantitative Methods, Comparative Politics, Sociology*

Professional Experience

Epinion, Consultant — 2021 –

- *Working as a consultant in the 'Transportation and Mobility' as well as the 'Epinion Analytics' unit*
- *Applied quantitative methods · Survey design and analysis · Package development in R · Data visualization*

University of Copenhagen, PhD fellow — 2019 – 2021

- *Enrolled as a PhD fellow at the Department of Political Science. I studied how various forms of political authority shape(d) economic dynamics throughout history*
- *My work relied extensively on sophisticated quantitative methods, descriptive and causal inference and on granular spatial data*
- *Awarded a Fulbright Scholarship ($14,000 grant)*
- *Relevant coursework: Advanced Quantitative Empirical Methods, Analyzing/Presenting Data/Information by Edward Tufte, The Logic of Quantitative Research, Mixed Methods Research, Research Designs*

University of Copenhagen, Graduate Research Assistant 2019

- *Hired by Professor Asmus Leth Olsen to create publication-ready graphics for a recent book publication. Performed data wrangling and data visualization in* `R`

Djøf, Consultant 2019

- *Hired as part of the 'DJØF index' project, which combined polling data from various Danish polling agencies to predict the 2019 Danish parliamentary election. Created daily visualizations of (trends in) predicted vote shares at the bloc and party level in* `R`

Damvad Analytics, Quantitative Intern 2019

- *Full-time internship, worked on various projects for private and public sector clients. Tasks included everything from data collection and analysis to creating presentations for clients*

The Danish Society of Engineers (IDA), Junior Analyst 2017 – 2019

- *Worked on various projects in close collaboration with the Chief Economist. Project manager for several analyses of membership survey data. Created an econometric analysis of membership attrition. Used* `MS Excel`, `R`, *and* `Stata`

University of Copenhagen, Graduate Student Instructor 2016 – 2017

- *Taught a third-semester class in 'Public Administration and Public Policy' at the Department of Political Science*

Danish Metalworkers' Union, Student Assistant 2015 – 2016

- *Worked in the President's Secretariat, assisting with analyses of labor union issues as well as industrial and research policy*

The Danish Ministry of Employment, Student Assistant 2014 – 2015

- *Worked in the communications department, assisting with redistribution of as well as written responses to citizens' inquiries*

Organzational Experience

PhD Program Committee, PhD Representative 2020 –

- *Part of the committee that runs the PhD program at the Department of Political Science*

SUL, Board Member 2017 – 2019

- *Board member of SUL, the National Labor Union for Graduate Student Instructors*

Programming Languages / Software

R (`RStudio`, `Tidyverse`, `ggplot2`, `sf`, `RMarkdown`, `devtools`, `roxygen2`)
`Stata` · LaTeX · `git` · `GitHub` · `SurveyXact` · `MS Office`

Data Analysis Skills

Data wrangling/cleaning · Visualization · Statistical modeling
Descriptive and causal inference · Web scraping · Spatial Data
Text-as-data

Language skills	Danish (*native*) · English (*fluent*) · Swedish (*basic*) · French (*rudimentary*) German (*rudimentary*)
Personal interests	Football and other sports · Football analytics · Sports betting Politics · Literature · Cooking · Traveling
